

**Amendments to the Drawings:**

The attached sheets of drawings include changes to Figs. 14, 17, and 18. The enclosed sheets, which include Figs. 13 and 14 and Figs. 17 and 18, respectively, replace the original sheets including these Figures.

Fig. 14 has been amended to reflect that the areas between the portions of the illustrated gray scale mask corresponding to channels 120, 121, 122, and 123 in Fig. 13 are actually black so that light does not pass through those portions of the mask during the described exposure step. Similarly, the portions of the mask corresponding to the channels have been amended to reflect that they go from almost black to increasingly lighter shades of gray. As such, more and more light will pass through each portion of the mask corresponding to a different channel as described in the specification.

In Figure 17, the reference number 169 has been added to conform the drawing to the revised description of Figure 16 appearing in the paragraph beginning at page 15, line 14 of the specification. In addition, a prior art notation has been added to conform the figure to the description in the specification.

In Fig. 18, the reference numbers 164 and 165 have been added to conform the figure to the amended description of the paragraph spanning pages 15 and 16 of the specification.
